Company Description and Background:

Plant Location: 3018 E. 55th Street, Cleveland, OH 44127

Primary Contact: Jacob Youngman, Owner

Inspection and Discussion

We arrived at The Scrapyard LLC (The Scrapyard) at approximately 11:30 a.m. We presented our credentials to Mr. Rob Petrilla and we proceeded to inquire about The Scrapyard's refrigerant handling.

Mr. Petrilla told us that they take all appliances but no automobiles. They received at least one appliance per day. They do not crush or shred any material on site. The Scrapyard does not recover refrigerant from appliances themselves. Mr. Petrilla stated that they do not accept an appliance if it contains refrigerant, though they do not collect verification statements.

The Scrapyard's refrigerant handling appears to warrant further investigation. We concluded our inspection at approximately 11:45 a.m.
